Buka Aplikasi Tokopedia dan login 2. pilih product dan tap beli langsung	3. tentukan jumlah 4. tap pengiriman dan pilih 5. tap pembayaran dan pilih ovo	6. muncul informasi transaksi sepert time limit, kode trans	transaksi berhasil dibuat	PASSED

## Jawaban Soal 2

in general, here are some common pre-conditions or assumptions that might be considered when writing a test script:

**Environment Setup:**

The test environment is set up correctly with all necessary software, hardware, and network configurations.

**Data Availability:**

Required test data is available and in the expected format.

**Application State:**

The application is in a known state before the test begins.

**User Permissions:**

The test user has the necessary permissions to perform the actions specified in the script.

**Dependency Services:**

Any external services or dependencies required for the test are available and functioning.

**Test Prerequisites:**

Any specific conditions or actions that need to be fulfilled before the test script execution.

**Test Data Integrity:**

Assumption that the test data is accurate and reflects the real-world scenarios.

**Browser or Device Configuration:**

Specific browser or device configurations are assumed for web-based applications.

**Network Connectivity:**

Assumption that there is a stable and reliable network connection, especially for tests involving online services.

**User Authentication:**

Assumption that the user is successfully authenticated if the test involves actions that require a logged-in state.

### Jawaban Soal 3

1. **User id Chosose** -> better user can make their own user id
2. **Password not have rule spessifaction** -> better to make stronger password
3. **confirm password is visible** -> please hide tbe confirm password
4. **Field name can have a special character** -> name better onlu use alphabet
5. **No Button Reload Captcha** -> better added
6. **There is field to input code for email verify**
